An sewyansow ma a yll bos vas dhe gowlwul polici dhe weres an taves Kernewek ha'n Gernowegoryon hag avodya'n enebieth gans an bobel erel.

## **Attitudes towards the Implementation of Cornish among the Population of Cornwall and Scilly**

### **Abstract**

During the last years, the implementation of Cornish in Cornwall has become more evident. However, since Cornish speakers constitute no much more than one percent of the total population, it is important to take into account the attitudes of the non-Cornish speakers in order to achieve some success. The attitudes of the general population towards the implementation of Cornish were analysed by PDA Research in 2007, which showed general apathy and rather weak opposition to the implementation of Cornish. This presentation, based on a survey responded by 430 people, provides a more detailed and updated vision on the people's views. It shows a very different panorama from the one described in 2007 and attitudes radically opposed between Cornish and non-Cornish nationals. It is expected that these results may serve to implement a more people's friendly language policy which may benefit Cornish and its speakers without encouraging opposition from the rest of the population.
